Offline Registration

It is a traditional method of registering the agreement

Customers have to come as per the SRO availability

Customer has to wait for longer hours until his turn comes for execution

Offline Registration is time consuming activity for the customer

The documents are typed on a hardcopy and thus, chance of errors are high

Online Registration

It is a modern way through digitization for registering the agreement

Customer is given a specific time for his registration

Customer completes his execution in less than half an hour within his allotted time slot

Online Registration saves a good amount of time for the customer

The documents being automated and entered in the software, the chance of error is very low

- 👉 The customer can avoid the public at SRO office by visiting directly at Builder's office in his given time slot thus, being safe and away from the risk amid pandemic and crowded locations.
- 👉 The registration takes place in the allotted time slot. The customer need not wait for extra time and execution is completed within 10-15 mins of time period.
